Teachers and their mentors
Editor: Vlasta Vizek Vidović
Library: Science and Society

Selected review extracts

“The book TEACHERS AND THEIR MENTORS: The role of mentorship for the professional development of teachers is written in an extremely interesting manner from its theoretical introduction about the teaching profession to the professional development of teachers and the role of mentors in this process of professional development, across relevant empirical insights collected in the Croatian educational system and concluding with recommendations on how to structure support for mentors in their work. “

Professor Vesna Vlahović-Štetić

„This book is an excellent combination of theoretical insights about the initial development of teacher identities and their further development as well as practical, authentic advice to beginner teachers on how they can become successful teachers – lifelong learners. “

Professor Dubravka Miljković
